

Table 1: Stakeholder register of marine turtle bycatch project

					Stakeholder Classification			Problems experienced by these stakeholders	Solutions to these problems
	Position	Organization / Company	Location	Role in Project	Main Expectations	Internal / External	Defender / Neutral / Opponent	Problems experienced by these stakeholders	Solutions to these problems
1	Director of Chelonia Colombia	Chelonia	Madrid	Project member	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Dealing with the fishermen, getting onboard the ship.	Greater degree of communication ensuring that the role of the fishermen is taken into account
2	President of NGO	Chelonia	Madrid	Project lead	The successful execution and testing of TED device, as well as the successful completion of the project. The obtention of funding to ensure the project's execution.	Internal	Defender	Getting funding for the project, dealing with the different stakeholders and ensuring project completion	Continue looking for funding in the different funding institutions through grant applications, ensuring communication between all stakeholders through meetings and enhancing communication with the fishermen (i.e. which is essential for project execution)
3	Projects director	Chelonia	Galicia	Project management	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Dealing with the fishermen (and ensuring project execution)	Greater degree of communication ensuring that the role of the fishermen is taken into account
4	Director of Mediterranean projects	Chelonia	Valencia	Project member	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Dealing with the fishermen	Greater degree of communication ensuring that the role of the fishermen is taken into account
5	Social Media	Chelonia	Valencia	Project member	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Really no direct problems - Just ensuring that the Social Media portray a positive image of Chelonia	No solution needed
6	Animal behaviour professor	Universidad Autonoma de Madrid	Madrid	Project collaborator (Associated expert researcher)	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Collaboration of the fishermen	Greater degree of communication ensuring that the role of the fishermen is taken into account
7	Professor	Universidad Complutense de Madrid	Madrid	Project collaborator (Associated expert researcher)	The successful execution of the project.	Internal	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project	No solution needed
8	Professor	Universidad de Valencia	Valencia	Project collaborator	The successful execution of the project as well as the obtention of scientific data that will only be possible with the collaboration of the fishermen, as well as the successful execution of the project.	Internal	Defender	Collaboration of the fishermen to access data	Greater degree of communication ensuring that the role of the fishermen is taken into account
9	President of NGO	CEMMA	Galicia	External researcher	No real interest or requirement of the project as CEMA is an organization that is external to the project. Although they do share a similar mission as regards to the organization, they really have no interest in the project.	External	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project	No solution needed
10	President of NGO	Xaloc	Valencia	Project	Xaloc's interest really is associated to the successful carrying out of the project, for the bycatch project to be successful and for the sea turtle's to be saved. It is also in Xaloc's interest to maintain a cordial relationship with the fishermen.	Internal	Defender	Project funding and fishermen collaboration	Greater degree of communication ensuring that the role of the fishermen is taken into account
11	Scientific technician	Generalitat de Valencia	Valencia	Project collaborator	The successful execution of the project with the successful testing of the TEDs with the collaboration of the fishermen, and there resulting saving of the marine turtles.	Internal	Defender	Stakeholder collaboration - Ensuring that this is a reality and that there is collaboration from the fishermen.	Greater communication and collaboration between all project stakeholders and this will only be achieved through the increase and improvement of communication between them.

12	President of fishing association	Cofradía de Gandia	Gandia	Project collaborator	Difficult stakeholder to deal with. In one hand they do not want their fishing practices to be altered, but they are collaborating, and at the end want to save sea turtles. However, the priority of course is their fishing catches and they do not want to be legally punished for bycatching sea turtles.	Internal	Defender	Representation - Their true protagonism being taken into account and considered.	Giving the fishing association a greater voice and greater protagonism in the media and other means. Taking them more into consideration /protagonism in the different project activities and recognising their work.
13	Researcher	Universidad de Valencia	Valencia	Project collaborator	The successful execution of the project as well as the obtention of scientific data that will only be possible with the collaboration of the fishermen, as well as the successful execution of the project.	Internal	Defender	Collaboration of the fishermen to access data	Greater degree of communication ensuring that their role of the fishermen is taken into account
14	Predoctoral researcher	Universidad de Valencia	Valencia	Project collaborator and volunteer	The successful execution of the project as well as the obtention of scientific data that will only be possible with the collaboration of the fishermen, as well as the successful execution of the project.	Internal	Defender	Collaboration of the fishermen to access data	Greater degree of communication ensuring that their role of the fishermen is taken into account
15	Predoctoral researcher	Universidad de Valencia	Valencia	Project collaborator and volunteer	The successful execution of the project as well as the obtention of scientific data that will only be possible with the collaboration of the fishermen, as well as the successful execution of the project.	Internal	Defender	Collaboration of the fishermen to access data	Greater degree of communication ensuring that their role of the fishermen is taken into account
16	Professor and researcher	Universidad Católica de Valencia	Valencia	External researcher	No direct relationship with the project but is working alongside the person that has helped to develop the TED Model that is being tested in Valencia. Evidently Jose Rafael wants the project to be successful in order to save the marine turtles in the area.	External	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project	No solution needed
17	Scientific consultant	Secretaría General de Pesca	Madrid	External project supporter	The successful execution of the project all in favor of the conservation of the marine turtles and protected marine areas.	External	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project. Ensuring that the project is carried out in a legal ethical manner.	No real solution is needed here as the role of the S.G Pesca is more legal than anything, although they may be of some help with regard to getting the support of the fishermen.
18	Volunteer	Chelonia	Huelva	Project volunteer	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal	Defender	Project funding and fishermen collaboration	Greater degree of communication ensuring that their role of the fishermen is taken into account
19	Professor	CEU	Valencia	Project volunteer	The successful execution and testing of TED device, as well as the successful completion of the project.	Internal/External	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project	No solution needed
20	Entrepreneur and professor	EAE Business School	Madrid	External	No real interest in the project but in favour of marine turtle conservation.	External	Defender	No real problem with regards to this stakeholder as there is no direct relationship between her and the project	No solution needed
21	Representative of ICUN (Specify specific role)	IUCN	Malaga	External	Successful project execution to benefit the marine turtles	External	Defender	No real problem as regards to the project. Is a supporter of the all project activities. The IUCN basically establishes the conservation status of the marine turtles.	No solution needed
